To whom it may concern,

Cam-Scott Truck and Trailer Repair Ltd has been using the Kleenoil Oil Filtration system for nine years now. We initially tested it on several units and were so pleased that we now have it installed on most of our fleet of ninety highway tractors. We also have the systems installed in a dozen of trailer reefer units with plans to install them in most of our units in the next few years.

With these systems installed in our tractors, we are now running our units up to 80,000 kilometers between oil service drops.

You can be assured that I am well satisfied with the Kleenoil Oil Filtration system and that the savings incurred by the reduced need of full oil services easily covers the initial cost of the installation of the system.

Sincerely,

**Brian Gilroy**

Garage Manager,  
Cam-Scott Truck & Trailer Repairs Ltd.
