

CROS CROFT TRANSPORT INC.
Dry Bulk Carrier

May 6, 2004

To Whom It May Concern:

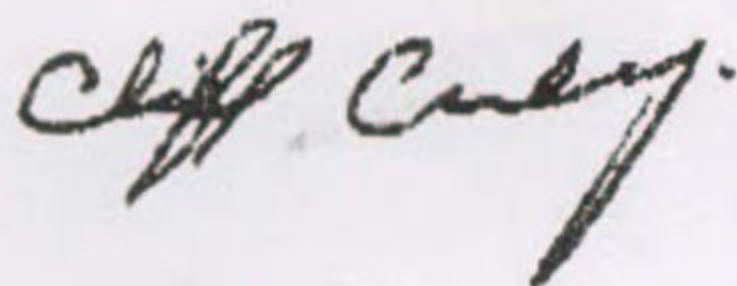

We have been using the Kleen Oil Filter Systems in our trucks for over 10 years now.

Previous kms and PTO blower time regulated engine oil and filter changes at approximately 1 month per unit. Since the installation of the Kleen Oil auxiliary oil system, the oil and filter changes have been extended up to 4 months. All units are subject to oil sampling and analysis reports at 15,000 km intervals. The usual oil analysis report returned reads "Data indicates no abnormal findings; re sample at normal interval."

Every unit entering the fleet, be it new or used is equipped with a Kleen Oil system before being put into service. These systems extend oil life resulting in lower oil costs as well as lowering waste removal costs.

This applies to all engines in our fleet which include: Cummins M-11 & M-14's, Caterpillar 3406 & C15's, Volvo VED-12's & D.D. Series 60.

Yours truly,

Cliff Crosby
President
