

Garry Mercer Trucking Inc.

To Whom It May Concern,

Three years ago, I introduced the Kleen Oil Filter system into the Garry Mercer Trucking Fleet. My main purpose in doing so was to extend our oil change intervals, and reduce our oil usage without compromising the engine life.

To do this we started out by conducting a few tests. In our first test, we changed the Kleen Oil filter every 30,000km but left the engine oil in, and the filter on. We found we were able to run the oil up to 140,000km without any problems. We still now only change the Kleen Oil Filter cartridge every 30,000km and leave the engine oil filter on for the life of the oil at 100,000km. This number was set by myself from the 140,000km due to my precautions toward the engine and the potential wear.

As we conducted our tests we monitored the samples through Wear Check Oil. Together with Garry Mercer Trucking they still play a large role in the operation of the Kleen Oil System program. With Wear Check we sample the oil every other service at 60,000km.

With using this system we have found positive results from different areas. We had an engine apart at 1,500,000km and once we dropped the rod and main bearings we found that the bearings were still good and able to stay in service. The Kleen Oil System has been compatible with both Shell Rotella 15w40 and Castrol Hypuron S 15w40 oils, and both have shown better results with the program then previously without. We have also tried to to run the extended oil drain without using the Kleen Oil System but found they were only able to extend to 60,000km before samples showed signs of wear.

The Kleen Oil System has given our technicians more time concentrate on other areas of the units because of its success. The program has also saved us a great deal of money on engine oil without compromising the engine life. The system is easy to install and easy to maintain. It is my opinion that the Kleen Oil System will not only save your company money and maintenance costs but help to protect the environment as well.
