Re: KLEENOIL & PowerUp products

Dear Ron:

It is hard to believe that it will be 2 years this December since you installed the Kleenoil system on my 2007 Freightliner. I just had to update you on my experience since I wrote to you in July of 2010.

When I wrote you last year I had 140,000 miles on my oil thanks to the Kleenoil system and PowerUp additives. Well, I kept that oil in till I reached 170,000 miles on it and had it tested at Speedco while I was having some other work done. Their oil analysis said it was okay to continue using! Incredible I said to myself, but I elected to drop that oil and have new oil put in. I was extremely satisfied with what your products had done for me and didn't want to push it any further.

Well, I added PowerUp to the new oil and have kept my Kleenoil filters changed every 20,000 miles and I am now going on **190,000 miles with the same oil.** This is just an incredible technology and I tell every owner operator I make contact with about it.

Thanks to you presenting me with Kleenoil and PowerUp **I have saved over \$2,700 in the last 18 months.** The Kleenoil system paid for itself in 3 months and the rest has been going in my pocket.

Please feel free to copy this letter and share it with others. Also, feel free to tell them to call me. The sooner they get on board with this combination the quicker they will realize significant dollar savings and just think if all trucks used this how much we could reduce our oil imports.

Sincerely,

A handwritten signature in black ink that reads "John Mixon". The signature is written in a cursive style.
