

# Merit Precision Moulding Ltd.

P. O. Box 268, 2035 Fisher Drive, Peterborough, Ontario, Canada, K9J 6Y8

An ISO/QS 9000 Company

As Maintenance Manager for our company, I am always looking for products that will aid in keeping our moulding machines operating at the highest level of efficiency and reliability possible. One of the most important and easiest tasks in ensuring that hydraulic machinery operates up to it's highest level is to take care of the hydraulic oil. Reducing downtime and repair costs and increasing component life expectancy is vital so when Brian approached me back in 2002 about a product that would perform these tasks, I agreed to have him install one of his Kleenoil filtration systems on our moulding machines. In less than six months we had Brian install Kleenoil systems on all our moulding machines and I can honestly say that these filters in conjunction with an annual oil sample test have become a very inexpensive and important instrument in our preventative maintenance program.

Fry's Filters have been providing a fast, courteous, and very knowledgeable service for our company for over 5 years and I look forward to our continued business relations. Any company wanting to reduce downtime and repair costs through an oil filtration system should definitely consider employing Fry's Filters and the Kleenoil Filtration System.
