For the attention of Paul

Dear Paul,

Re: Fuel Protection System – Kleen Oil Ltd

We would confirm we have been using fuel and oil filters from the above for the last 15 years.

During this time we have found the product most effective and service excellent.

In particular with respect to the fuel protection this has been particularly relevant to our operation – as a hire company we have little control over the quality of the fuel used on our machines.

The fuel filters provided by Kleen Oil have been most satisfactory.

Yours Faithfully
For **PARKER PLANT HIRE LTD**
