To whom it may concern,

Re: Kleenoil By-Pass Filters

It is with great satisfaction that I endorse this product. I have been a faithful user of the Kleenoil By-Pass Filters on two of my Detroit 60 Series trucks since purchased new in 1997. I have also implemented the Kleenoil By-Pass Filter System on the rest of my fleet of 14 trucks with comparable success. The 1997 Detroit 60 Series trucks currently have 2,000,000 kms on them and I feel I have extended the engine life. We have extended the intervals for oil changes from the standard 20,000 kms to 80,000 kms. By changing the Kleenoil By-Pass Filter every 18,000 kms and changing the oil only every 80,000 kms, I feel we have experienced fewer mechanical and engine failures. The added plus of reduced oil consumption has translated into a huge decrease in my truck maintenance expenses. This has translated into a higher profit margin for our trucking business. This along with environmental issues concerning conservation, reduction in consumption of oil products and the concern for emission controls make this product a winner.

Sincerely,

Wm. D. Fraser
President
